Professional Experience

Software Developer

Aug 2025 – Present

MyEdMaster

Remote, USA

- Built and maintained responsive **React** UI for a healthcare assessment platform serving **1,000+ daily users**, delivering interactive test-taking workflows and results dashboards in an Agile sprint cadence.
- Led a full backend migration of **6 REST API endpoints** from **Node.js** to **Django**, achieving stack consistency across all cloud services and reducing onboarding time for developers.
- Integrated **OAuth** authentication across the frontend, replacing insecure access patterns and enabling role-based secure retrieval of clinical assessment results.
- Shipped a gamified learning application end-to-end in **React**, from concept through production release, resulting in a published paper in the *International Journal of Social Sciences and Economics*.

Research Assistant

Feb 2025 – May 2025

Worcester Polytechnic Institute

Worcester, MA

- Implemented an AI-powered thermodynamics tutoring chatbot using **LangChain** and the **OpenAI API** to guide students through complex problem-solving steps in a chat workflow, saving **5–10 minutes per problem**.
- Architected and deployed a research web platform serving **200+ users** on **AWS (EC2, Lambda, RDS)**, instrumented with **CloudWatch** monitoring to support reliable usage during the study period.
- Collaborated with researchers to define requirements, participate in design and code reviews, and document implementation details to keep the system maintainable.

Backend Developer Intern

Jul 2022

AKVI

Mumbai, India

- Built a web application to streamline internal supply-chain workflows by replacing manual steps with a self-serve dashboard, reducing supply-chain cycle time by **30%**.
- Designed and implemented the **MySQL** data layer from scratch (schema and optimized queries), cutting manual operational steps by **50%** and improving data availability for day-to-day decision-making.
- Debugged production issues in an existing codebase and shipped fixes that improved stability and reduced repeat operational rework.

Education

Worcester Polytechnic Institute

Worcester, MA

M.S. Computer Science

May 2025

- Coursework: Operating Systems, Algorithms: Design and Analysis, Design of Software Systems, Artificial Intelligence, Machine Learning, Deep Learning, Big Data Analytics.

Thadomal Shahani Engineering College – University of Mumbai

Mumbai, India

B.E. Information Technology

Jun 2023

- Coursework: Database Management System, Advanced Algorithms, Artificial Intelligence, Machine Learning, Blockchain, Image Processing.

Projects

V0 Clone — AI Code Generator | JavaScript, React, Node.js, Python, PostgreSQL, Prisma, Inngest, AWS

April 2026

- Developed a responsive **React** UI for code generation workflows, implementing reusable components and clear state management for maintainability.
- Designed an event-driven backend using **Inngest** for async job execution, including **idempotency** and safe retries for long-running workflows.
- Modeled and implemented **PostgreSQL** schemas with **Prisma**, optimizing read paths for fast retrieval of generated artifacts.

Auction House — Real-Time Bidding Platform | TypeScript, React, Node.js, PostgreSQL, Jest, CI/CD

Sep 2024

- Built React UI for a real-time bidding experience, focusing on responsive layout and predictable user interactions under frequent updates.
- Implemented a concurrency-safe bidding engine with transactional patterns in **PostgreSQL** to prevent race conditions and enforce fair ordering.
- Wrote **Jest** unit tests and configured CI to run tests on each change, improving confidence in bug fixes and incremental feature delivery.

Skills & Interests

Frontend: React, JavaScript (ES6+), Java Spring, HTML5, CSS3, Responsive Design, Data Visualization

Backend: Node.js, Express.js, REST APIs, OAuth, Event-Driven Systems

Databases: PostgreSQL, MySQL, SQL, GraphQL, Prisma ORM

Testing/Quality: Jest, Unit Testing, Debugging, Code Reviews

Tools/Cloud: Git/GitHub, CI/CD, AWS (ECS, API Gateway, Lambda, RDS, S3, CloudWatch), Docker

Languages: TypeScript, JavaScript, Python, Java, SQL, C++

Interests: SaaS product development, UI engineering, accessibility, performance, developer productivity
